LONG-RANGE AIRLINER

Designed to accommodate the increasing number of travelers between Asia and the United States, the MD-12 airliner could carry up to 375 passengers as far as 9,200 miles nonstop. The 242-foot-long tri-jet craft might also feature lower-level lounges and galleys. McDonnell Douglas estimates that the first MD-12s will be available in 1997 at a cost of about \$130 million each.

CITY IN THE SEA

To promote trade and cultural exchanges among Japan, China, the Commonwealth of Independent States (formerly the Soviet Union), and North and South Korea, Japanese visionaries have proposed an international city on a man-made, 1.2-square-mile island. The Japan Sea Acropolis would accommodate 50,000 to 100,000 inhabitants and could be completed in 15 years for about \$254 billion.
